

WATER TECH Blue Pearl

The Blue Pearl is the best climbing, cleaning, and brushing robotic cleaner ever made. We install our patented PVA (poly vinyl alcohol) brushes on every machine. Originally designed to climb the slick tile walls of European pools, PVA brushes offer up 100% greater traction, virtually clinging to the walls and providing unequalled gripping ability. It's almost like having a scrubbing sponge for the pool. This special material lasts twice as long as conventional rubber brushes found on all other brands, and it resists oil, bacteria, algae and other contaminants. The Blue Pearl saves time and wear and tear on both the pool and cleaner itself. The Blue Pearl's Smart cleaning pattern (which has made obsolete the ineffective zigzag and grid cleaning patterns other robotic cleaners still follow) features a "One and Done", almost surgically precise, cleaning swath.

- Just place in pool, switch on and everything else is automatic. Shuts itself off when pool is crystal clear and clean.
- Cleans Entire Pool In Only 3 Hours
- Built-in Air and Obstacle Sensors
- Cleans Floors, Walls & Most Steps
- Hand-crafted, using the Highest Quality Components
- Removes All Debris: Algae, Sand, Leaves, etc.
- 2 Micron Filtration
- Operates for pennies a day
- Totally Independent: No installation, No Hoses, No Booster Pumps, No Suction Lines
- Safe, Operates on a 24 Volt Step-Down Transformer

BLUE PEARL SPECIFICATIONS

Cord Length	60 ft
Factory Warranty	1 year on motors
Suction Power	4200 gal/hr
Cleaning Coverage	3500 sq.ft/hr
Filter Porosity	2 microns
Unit Weight	16.5 lbs w/o cord
Electrical Req.	115v/60hz
Drive Motor	24v DC Oil Free High Speed Brushless
Pump Motor	24v DC High Flow
