Compu Pool Products warrants the generic replacement cell for a period of two (2) years (commercial installations for a period of 12 months). Due to Compu Pool Products' long life, high performance electrodes the warranty is in effect from the date of manufacturing for a period of two (2) years (commercial installations for a period of 12 months).

It is important to highlight that all of Compu Pool's 'generic' replacement cells never place users at any additional safety risk. At no time when installing a Compu Pool 'generic' cell will the user come in contact with the AC voltage. All of Compu Pool's replacement cells run off DC power, which can not electrocute the installer. This is known as the secondary side or the low voltage side. Compu Pool has also embarked on an independent laboratory testing for safety and quality of manufacture on our range of 'generic' replacement cells, emphasizing our pledge to the highest safety and quality standards.

To highlight our commitment to the aftermarket salt chlorination business we will be providing the following warranties for all replacement cells supplied by Compu Pool:

- Compu Pool will warranty any genuine warranty claim that the original manufacturer voids due to a direct problem arising from the use of a Compu Pool 'generic' replacement cell.

- All Compu Pool 'generic' replacement cells will provide a minimum 2 year warranty, in most cases exceeding the original manufacturer's original unit and replacement parts warranties.
