RESIN

St TROPEZ

RESIN

Shown with Fallston Wall

54" Wall Height

Two-Piece Sculpted Resin Ledge Covers

100% Resin Frame

100% resin frame provides the ultimate corrosion protection, unavailable in any steel-frame pool. Plus, the thermal properties of resin keep the frame comfortable to the touch on the hottest of summer days.

SunSafe™ Extruded High-Density Resin 8.5" Top Ledge and 7.5" Uprights

The UV inhibitors in the scientifically-formulated cellular resin resist the effects of summer sunlight and heat, and ensure the durability of your pool.

ArmorCoat™ Exterior Wall Sealer

ArmorCoat™ liquid-applied resin sealer on the outside of the galvanized steel wall provides ultimate protection against the elements.

LiquiLok™ Epoxy Interior Wall Backer

Capillary action often draws moisture from the soil up between the wall and the liner of your pool. LiquiLok™ true epoxy repels the moisture and protects your pool wall.

100% Resin Base Assembly

The 100% resin Bottom Plate, Foot Cover and Expanded Bottom Rail Assembly eliminate contact between moisture and chemicals in the soil and the steel wall.

Space-Saving Braceless Oval System

Lifetime Warranty

The Perfect Finishing Touch

Backyard Leisure Pools offer a wide selection of deck and fence kits engineered to complement your new pool

We've got YOUR size!

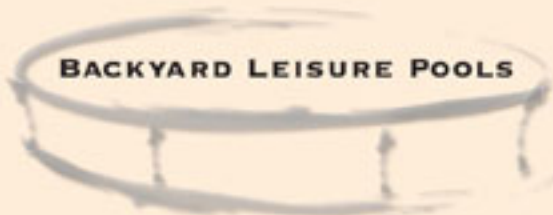

ROUND POOLS

Pool Size	U.S. Gallons
