CLEANS WHERE YOU CAN'T!

NET CONTENTS: 67.6 FL. OZ. (2L)

**Purge attacks the
root cause of most pool
maintenance problems...
the buildup of organic waste
contamination.**

Organic contaminants like oils, lotions, sunscreen, cosmetics, hair products, and sweat are the underlying root cause of many pool issues. High organic loads will cause cloudy water, hard to maintain chemical levels, clogged filters, foaming and nasty waterline ring.

These contaminants collect and build up in your pool circulation system and filter. By purging the pool of this organic build up, the symptoms of high organic loading will be eliminated. **Purge cleans where you cannot...**

Directions:

Recommended Use:

Minimum once per year, or as often as needed.

1. With circulation pump running add entire contents of 2L Purge bottle to skimmer(s).
2. Circulate for 24 hours.
3. Backwash or clean filter.
4. Shock the pool to boost sanitizer levels. Proceed with regular pool water maintenance.

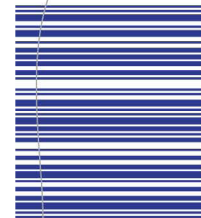

When following your dealer recommended weekly pool maintenance program, include Natural Chemistry's Pool Perfect + PHOSfree for unsurpassed water quality and continual reduction of organic contamination.
