- Built in LCD screen with keypad for instant speed programming
- Built-In On Board Freeze Protection to protect your investment
- Variable Speed combined with a 230 volt motor will save you \$100's in energy costs
- **Free Shipping** (Continental US only)

The new design of the IntelliFlo Variable Speed pool pump will replace all others. This is an "intelligent" pump with 8 speeds which can help cut the pool portion of utility bills up to 90% and save you hundreds of dollars per year and thousands of dollars over its life. The Pentair 011018 pump works on any pool or spa, regardless of plumbing size, filter type/size or feet of head, etc. This is a good thing to know because not many people care about let alone understand what "feet of head" is. That's the beauty of having a pool pump that varies in available speeds. It's truly the one pump fits all applications that has helped make this pump become the number one selling pump in the industry.

An added benefit is that many utility companies offer a rebate if you install an eco-friendly, energy saving variable speed pool pump. Typically these pumps have payback through energy savings within the first year and a half of operation. Just another reason why this pump may vary in speed it never varies in savings. You'll save all the time. Another reason why it is the most popular variable speed pump on the market that will work on every residential pool in the industry.

Pentair Aquatic Systems is the first pool pump manufacturer in the industry to receive Eco-Friendly Energy Star Certification on four of its variable speed/flow swimming pool pump families; IntelliFlo [Variable Speed Pumps](#), IntelliFlo VF [Variable Flow Pumps](#), [IntelliFlo VS+SVRS](#) pumps, and [IntelliPro VS+SVRS](#) pumps.

An [Eco Select](#) Choice: Standard pool pumps can consume as much energy as all other home appliances combined, often costing residential pool owners more than \$1,000 per year! IntelliFlo pumps can typically cut energy use up to 90%, generally saving \$620 to \$1,360 in utility costs annually...more where rates are higher than average. See below for a Smart Comparison on Energy Savings.

Energy Cost per Kilowatt Hour (kWh)	Estimated IntelliFlo Pump Savings Per Year	Estimated IntelliFlo Pump Savings After 5 years
\$0.16	Up to \$1,500	Up to \$7,500
\$0.20	Up to \$1,800	Up to \$9,000
\$0.30	Up to \$2,799	Up to \$13,500

Get the IntelliFlo today and find more money in your pocket tomorrow and every day there after!
