

## LM-20

**COMMERCIAL QUALITY,  
RESIDENTIAL PRICE POINT**

The LM is engineered to bring light to areas such as walkways, stairways and decks as well as to other foot traffic hazards that don't have an adjacent planter area for path lighting or trees and trellis from which to down light.

Incorporated into the design is the LevelX feature. The LevelX assures the lighting installer that the faceplates of these permanently mounted fixtures will remain perfectly level upon completion of the installation. Many step and wall lights on the market today are designed so that if the mounting box is installed out-of-level, the faceplate, once installed, will also be noticeably out-of-level.

Some of the features of the LM include: Sleeve permanently mounted in concrete or wood wall combined with multiple threaded knockouts, easy-to-remove box for unforeseen future problems, which prevents having to chip away at the wall for repairs.

**Perfection Every Time**

With the LevelX feature built-in, the designer can be in complete comfort that the fixture will be installed on a perfectly level visual line. With the durable, sturdy materials, the user can have confidence that the fixture can last for years on end.

# ORDERING INFORMATION

## LM: Wall Light

FACTORY INSTALLED OPTIONS: Order 1 + 2 + 3

FIXTURE CODE	LAMP CODE	FINISH OPTIONS
<b>1</b> LM	<b>2</b> 20 (10,000 Hrs Xenon)	<b>3</b> XX (see options to right)
	20H (2,000 Hrs Halogen)	

The LM includes two 10 watt Xenon or Halogen lamps, your choice of faceplate finish and a mounting sleeve.

EXAMPLE: **LM-20-SB** = LM - 20 W Xenon - Bronze Metallic Finish

### MOUNTING FEATURES AND DIMENSIONS:

#### Perfection Every Time

The LevelX system allows the composite sleeve to be up to  $\frac{3}{8}$ " out of level, in either direction, while still allowing the faceplate to be laser level.

The secret: The trim attaches to the adjustable reflector assembly - not the composite sleeve or body. Heavy foam gasket keeps light spill to a minimum.

### METALS

CU = Copper

NP = Nickel Plate

### POWDERCOAT

WG = White Gloss

FW = Flat White
