POOL BLASTER

Pool Blaster PRO Vacuum Systems ... Designed with the pool cleaning professional in mind

At the heart of each system is the Pool Blaster PRO which gives maintenance personnel a unit with three times the cleaning time, three times the debris capacity and twice the vacuuming strength of our popular Pool Blaster MAX residential pool cleaner.

The Pool Blaster PRO is capable of vacuuming debris as large as golf balls or as small as sand, silt and algae, retaining this waste in its large, on-board filter bag. Completely self-contained, the PRO is furnished with two re-chargeable battery packs which provide power for up to three hours of continuous operation. The Pool Blaster PRO is easily attached to a standard 1.25" diameter pool pole. It can be maneuvered by hand using the integrated handle for greater precision when cleaning steps or seats.

Pool Blaster PRO Vacuum Systems, with no external pumps, filters or hoses, allow pool cleaning pros to get the job done quickly, efficiently and more economically!

PRO 900 System

The PRO 900 System teams the Pool Blaster PRO vacuum with a flexible fifteen inch wide linear vacuum head. This package includes three high-volume filter bags (the standard mesh "All-Purpose" bag, the Sand & Silt bag and the high density Microfilter bag), one wall charger, two re-chargeable battery packs and an adjustable shoulder strap to free up the operator's hands to and from the jobsite.

PRO 1500 System

The PRO 1500 System includes all of the features and accessories of the PRO 900 System. Replacing the fifteen inch vac head, is the PRO 1500's omni-directional vacuum head adaptor and industrial grade nineteen inch wide, weighted vacuum head package. This combination enables maintenance personnel to clean pools, reflecting ponds, fountains and other water features even more effectively and efficiently.

POOL BLASTER
PRO
900

The Pool Blaster PRO 900 features a commercial grade, fifteen inch wide flexible vacuum head equipped with ABS wheels and scrubbing brushes.

POOL BLASTER
PRO
1500

The Pool Blaster PRO 1500 features an industrial grade flexible vacuum head with a impressive nineteen inch width and 12 Polyurethane Ball-Bearing suspended wheels! A wider, more powerful head means greater suction and less time spent cleaning.
