GO WITH THE FLOW

## SYSTEM 3 RETROFIT KIT – NOW AVAILABLE!

Are you tired of lifting and cleaning the System 3 filter cartridges? Excel Filters offers an easy alternative. The System 3 Retrofit Kit replaces the cumbersome and expensive OEM cartridges and you can keep your EXISTING vessel!

### The benefits include:

- 3 compact cartridges replace the heavy System 3 but have the same square footage as the original.
- No extra tools or winches needed to lift the filters for cleaning.
- Takes seconds to install.
- Great value - saves time and money on the replacement filters.
- Improved filter performance with cartridges that last equally as long with no bypass issues resulting in clearer pool water.

### The System 3 Retrofit Kit comprises:

- ONE manifold.
- TWO seconds to install or remove manifold for cleaning.
- THREE easy-to-use cartridges providing the same square footage of media as the original OEM filter cartridges and better performance.

	OEM CARTRIDGE #	EDEN REPLACEMENT CARTRIDGE #
S7M120 (300 SQFT MEDIA)	25021-0200S (Inner Cartridge)	<b>XLS-7002 (SET OF 3)</b>
	25022-0201S (Outer Cartridge)	
S8M150 (450 SQFT MEDIA)	25021-0202S (Inner Cartridge)	<b>XLS-842 (SET OF 3)</b>
	25022-0203S (Outer Cartridge)	

### **BEFORE – Heavy, bulky & inefficient**

### **AFTER – Compact, efficient and long, useful life**

## ENGINEERED ADVANTAGES

### **The System Retro-Fit Kit benefits include:**

- **3 compact cartridges that replace the heavy System 3 but have the same filtering capacity and square footage as the original.**
  - Why spend additional money to replace your pool filter vessel when there is a better solution? With the System 3 Retro-fit Kit, you can quickly improve the service and reliability of your Sta-Rite filter while reducing your ongoing operating costs.
- **No need for extra tools or winches to lift the filters for cleaning.**
  - When wet and loaded with debris, the OEM filters can weigh over 100 pounds! They can also be awkward and dangerous to handle without a winch, or the aid of another person. The System 3 Retro-fit Kit solves this problem by providing the same cleaning capacity and media square footage while being easily serviceable by one person.
- **Great value - saves you time and money on the replacement filter cartridges.**
  - Not only are the System 3 cartridges expensive, they are also difficult to locate in stores or online. Eden Equipment is your one stop shop for the System 3 Retro-Fit kit and replacement filter cartridges.
- **Better performance, better value, and brighter, cleaner pool water.**
  - Physically, most cartridges in the market can last for 5-8 years before any of the materials break down. However, the **useful** life of any cartridge is often far shorter than its **physical** life. The useful life is the proper metric by which to compare the value of a filter cartridge. No matter how often you clean your filter or how often you use your pool, any filter cartridge will eventually become clogged with body oils, sunscreens and other debris. After the useful life of a cartridge ends, there is little, if any filtration actually taking place. Dirty water is simply finding a way around the clogged cartridge and back into your pool. This is called bypass – and it is not good. The Retro-Fit kit is comprised of a manifold along with properly sized cartridges that prevent bypass and maintain a long useful life - and a much cleaner pool.
- **Takes seconds to install.**
  - Installation is simple! Lower the plastic manifold into the vessel and it snaps into place. No need for any permanent or complicated changes to your vessel.

Partner with Eden Equipment for all your replacement filter cartridge needs. We offer a full line of cartridges with such features as **open flow, anti-microbial cores** for improved filtration, **premium grade media** that guarantees filter function, durability and ease of cleaning, **anti-microbial end caps, drop ship** options and **private labeling**.
