

Directions for use:

(Do not use with biguanides)

Initial Dose: Add 32oz of PRO SERIES **Stain & Scale Control** per 10,000 gallons of pool water, directly to pool. If water hardness level is above 500ppm (parts per million), or metal readings are above .5ppm, or if being used during start-up of a new plaster pool, double the recommended dose.

Maintenance Dose for Scale Control- MONTHLY:

Add 5oz per 10,000 gallons of pool water per month.

Maintenance Dose for Metal Control- WEEKLY:

Add 4oz per 10,000 gallons of pool water per week.

Always add product to balanced pool water. Do not add product within 2 days of adjusting calcium hardness or during a full pool acid bath.

FOR NEW, REMODELED or REFINISHED POOLS:

Add 1/2 gallon of PRO SERIES **Stain & Scale Control** per 10,000 gallons. Add product to pool water after pool is full to reduce the chance of plaster dust formation, scaling and metal staining. Balance pool water.

PRO SERIES **Stain&Scale Control** can be used in any type of pool and with most types of commercial pool sanitizing systems (do not use with biguanides). It has no adverse effects on water chemistry. Swimmers can use pool immediately following treatment.
