

# ABOVE-GROUND POOL FENCING SIZING CHART

To estimate which kits you will need to enclose your pool, just count the number of "Fence Sections". A fence section is the amount of fencing used to span between two pool uprights. Simply count the number of sections you require and refer to the chart to the right for the breakdown of kits required.

This Chart Refers to our AG Pool Fencing Item No. NE145 - NE147, NE1301 - NE1303 & NE1331 - NE1333.
