A working WiFi network is required for the touch pad to connect.

# Automatic Safety Cover WiFi Touch Pad Control

- Program up to 4 user codes
- Intelligent limit sensing
- Digital screen display
- Programmable service company contact information
- Attractive aluminum switch cover plate

**The Touch Pad with WiFi also includes the ability to send notifications to the homeowner.**

The user notification will provide the homeowner with an alert via text or email that can notify them for a number of different occurrences. The homeowner can select which of these occurrences they would like to be notified of including:

- When the cover is opened.
- When the cover is closed.
- When any of the 4 users log in. The homeowner will know who is using the pool cover.
- If the cover is open too long. (*amount of time set by the homeowner*)
- Free monthly notification service included.
