

**JANDY PRO SERIES OZONE**  
POOL & SPA OZONE GENERATOR

Advanced Water Sanitizing.  
Uses Less Chemicals.  
Compatible With Chlorine.

Delivers the high-output and energy efficiency of a true corona discharge ozone generator in a simple-to-install, extremely reliable system.

The logo for Jandy Pro Series is displayed within a silver, metallic-looking frame. The word "Jandy" is written in a large, elegant, white serif font, with a registered trademark symbol (®) to its upper right. Below "Jandy" are three white, curved lines that resemble water ripples. To the right of these ripples, the words "Pro Series" are written in a smaller, yellow, sans-serif font. The background of the frame is a dark, textured grey.

Jandy®  
Pro Series

The Jandy Pro Series Ozone is a high-output, long-life corona discharge system for the cleanest, clearest water possible.

#### **Reliable**

- » Engineered for high output and long life
- » The corona discharge module is designed to be impervious to moisture and acids

#### **Easy to Install**

- » Simple installation on both new and existing residential pools
- » Easily wall mounted and wired to pool timer
- » Two installation kits provide versatile plumb-in options

#### **Energy-Efficient**

- » System generates high ozone output with low energy cost

#### **Sustainable**

- » Quickly and naturally oxidizes organic contaminants, then immediately breaks down into pure oxygen without creating harmful or irritating disinfection byproducts

#### **Versatile**

- » Supplements existing chlorine feeders, mineral sanitizers, and salt water systems
- » Fully compatible with the Nature<sup>2</sup> line of EPA-registered mineral sanitizers

#### **How Ozone Works**

Ozone is produced when oxygen from ambient air is introduced to electrical energy. The electrical energy splits the oxygen molecules into two individual oxygen atoms that unite with other oxygen molecules to produce ozone O<sup>3</sup>. By dissolving the ozone in water, an oxidation reaction is allowed to occur as soon as the ozone molecule contacts organic material. The byproduct of this reaction is harmless decomposed organic material ("dirt") which will be captured by the filter and removed from the water, and oxygen (O<sup>2</sup>).

## Corona discharge for maximum efficiency and long-term reliability

Corona discharge is a far more energy-efficient method of producing ozone - especially when compared to UV-generated, or so-called "hybrid" systems.

Oxidizes waterborne organics quickly and effectively without undesirable disinfection byproducts or chloramines.

## Choose Your Ozone System

**Ozone Generator CD40**  
for pools up to **40,000** gallons

**Ozone Generator CD70**  
for pools up to **70,000** gallons

**Ozone Generator CD100**  
for pools up to **100,000** gallons

## Choose Your Installation Kit

**CDIM**  
**Corona Discharge  
Injector Manifold**

Injects ozone directly  
into the water.

**CDMDV**  
**Corona Discharge  
Mixing Vessel**

Mixes water and ozone  
in a tube before delivery  
into the water.

**CAUTION:** To avoid any potential hazards and to ensure reliable, and efficient equipment performance, never draw gas (particularly a potent oxidizer, such as ozone) into the suction side of a pump. Doing so may also void manufacturer warranties.
