

Wave

Residential Chlorinator

- ➔ Affordable, High Performance System
- ➔ Easy Inspection with Clear Cell Housing
- ➔ Easy to Clean Cell; No Need to Use Acid

- ➔ 5 Year Residential Warranty
- ➔ User Friendly Operation
- ➔ Robust, Durable Design

Benefits of Saltwater Chlorination

Technological advancements in salt water chlorinators have yielded equipment that are low maintenance and reasonably priced, eliminating the need to buy, add or store chlorine.

Saline Generating Systems combines this advanced technology in a system that is simple to operate and easy to maintain, designed with our customer in mind. SGS Chlorinators have the highest output and the longest warranty of its kind.

The Wave Chlorine Generator is available in two sizes for residential pools, depending on gallonage and the sanitization requires of the pool.

Wave 20 Maximum Pool Size: 20,000 gallons* Production: 0.78 lbs. per day

Wave 40 Maximum Pool Size: 40,000 gallons* Production: 1.35 lbs. per day

* When determining the sanitization needs of a body of water, increased demand conditions may exist due to warmer climates, humidity, high bather load, water features and other environmental factors. When these conditions are applicable, the maximum pool size should be reduced by at least 25%

** The Wave System has a **FIVE YEAR** Residential Warranty. Years one and two SGS will repair or replace any "Wave" parts in the unit that are confirmed to have been defective at no cost to the Customer. Years 3, 4, and 5 are pro-rated at 60% of MSRP value.

User Friendly Operation

Easily manage the chlorine level in your pool with the Wave's simple to use, one touch, control panel

Clear Cell Housing

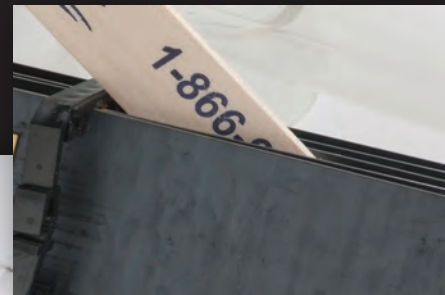

Electrodes are completely visible, making cell inspection simple, even when the system is operating

Superior Cell Design

The Wave cell is independent of the clear housing; cleaning is accomplished in a couple of minutes with the 'ARD'. **NO NEED TO CLEAN THE CELL WITH ACID!**

Clear cell housing for easy visual inspection.

NO NEED TO USE ACID!
Easy Cleaning with the ARD.
