So why do you need a cover for your pool?

Many reasons, from savings on heating costs to keeping the pool clean.

According to the United States Department of Energy, using a blue bubble cover can cut heating bills by 70 percent or more, increase water warmth by 10 degrees or more in season, conserve water and chemicals, and, obviously, keep the pool cleaner.

Outdoor pools lose heat from evaporation, radiation and convection.

Evaporation is responsible for 50-70 percent of heat loss. According to one authority, an uncovered pool of 26' by 39' can lose up to 180 gallons of water a week. Covering your pool will eliminate heat loss through evaporation and significantly reduce loss from radiation and convection.

Preventing evaporation and chemical loss means savings to you.

Environmentally you will help by using a cover on your pool. Water is a precious natural resource and we must take care to conserve whenever possible.

You will want to place and retrieve the cover with the minimum of effort. That's where a reel system comes in.

Rocky's precision-crafted rollers come in various sizes and styles, for mounting at poolside, under diving boards and on walls. Easy to install, simple to operate.

Rocky's get people into pools faster!

Which Reel System do I buy?

That's a good question.

Before you make a decision on which reel system to buy, we suggest that you look at what is available on the market and compare the quality.

Most important is the material used to make the reel system. Will it stand up to constant use, and not deteriorate when left out in the elements? This is an important point, as most reel systems spend the majority of the time outside.

We believe that once you have taken the time to check out the competition you will decide that Rocky's is the reel system for you. It's easy to operate and comes in a variety of models. Rocky's high quality

materials, die-cast aluminum, superior enamel finish, Satin Lustre anodized tubing and low maintenance features enhance your investment now and for years to come.

We provide a full ten-year warranty—proof that we are offering you the best product. The warranty means peace of mind for you, and we promise hassle-free service if any problems arise during the warranty period.

We guarantee it.

Rocky's Reel Systems Inc.

Rocky's get people into pools faster! Eazy to use—impossible to beat

Precision-crafted from sturdy die-cast aluminum, Rocky's Eazy Rollers® come in various sizes and styles, all with long-lasting baked enamel finish. Satin Lustre anodized tubing is available for all models.

Rocky's are not affected by temperature changes or the sun's rays, and Rocky's few moving parts make it easy to maintain.

Rocky's ensures that your investment will give you years of trouble-free service. That's why all Rocky's Eazy Rollers® are covered by a ten-year warranty.

3A Residential Portable

This is the most popular of Rocky's Eazy Rollers®, designed for use as a portable unit. Just reel in the cover, release the anchor bolts and wheel it out of the way. It's as simple as that. Uses the AT-1 and AT-2 Rocky's 12-sided adjustable anodized tubing.

4A Residential Permanent

Permanent mounting of this unit by means of four stainless steel bolts and stainless anchors ensures that this unit will remain where you put it. When the unit needs to fit under a diving board, please ensure you have 15-inch clearance to allow for operation.

This unit also uses the AT-1 and AT-2 Rocky's 12-sided adjustable anodized tubing.

5A Residential Portable System

The largest of the residential systems. The #5A, designed with larger residential pools in mind, will make removing the cover easy for you and, being portable, will allow you to remove it from poolside without any fuss. The #5A also uses the AT-1 and AT-2 Rocky's 12-sided adjustable anodized tubing.

Rocky's Residential & Commercial Systems

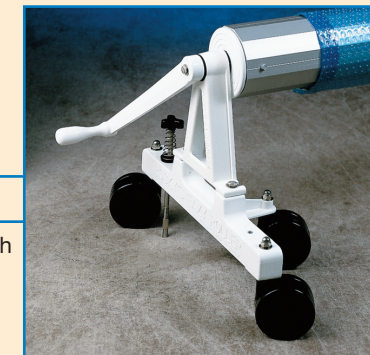

Rocky's Junior Commercial

Designed for smaller commercial pools. The Junior has four-inch hubs and a commercial grade handle. Six four-inch casters and a third leg make maneuvering easy.

Uses Rocky's four-inch 12-sided Heavy-Duty Commercial Anodized Tubing.

Rocky's Senior Commercial

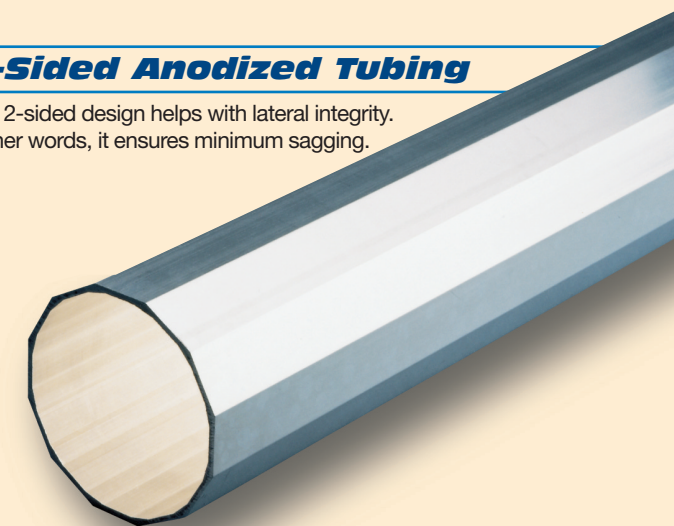

This unit is for large commercial pools. It comes with four-inch hubs and a commercial grade handle. Extra-high and with six four-inch casters and a third leg for easy movement poolside. Uses Rocky's four-inch 12-sided Heavy-Duty Commercial Anodized Tubing.

Minimum of parts, easy to assemble.

12-Sided Anodized Tubing

The 12-sided design helps with lateral integrity. In other words, it ensures minimum sagging.

Residential three-inch Tubing

The AT-1 Adjustable Tube Set is for pools up to 20 feet wide. The AT-2 Adjustable Tube Set is for pools up to 24 feet wide.

Commercial four-inch Tubing

Rocky's four-inch anodized 12-sided Heavy-Duty tubing is available in sizes from 16-33 feet.
