

SABER® Grills: Built Stronger to Last Longer

Better Construction

- Not all stainless steels are created equal. Stainless steel used in SABER® grills is guaranteed to be 304 Commercial Grade.
- No flex lid design ensures years of smooth operation.
- Built-in tilt storage for warming rack.
- Burner boxes, firebox liners, and grease trays are porcelain coated for easy cleanup.
- Fully welded 1" steel tube frame (both cart and firebox) provides superior strength and stability.
- SABER® grills are certified to the highest safety and performance standards available, ensuring safety and reliability.
- Streamlined assembly process — means you're grilling sooner with a SABER® grill.
- Easily change fuel sources from propane to natural gas, or for built-in grills from natural gas to propane, using our patented EZ NG or EZ LP conversion kit. (sold separately)
