HAYWARD®

AquaVac® 500
ROBOTIC CLEANER

···

Scrubs, vacuums pool floor, coves, walls and waterline with computer efficiency.

AquaVac 500 comes equipped with a microprocessor-based program that optimizes the cleaning path for the best pool coverage. With its Dual-Mode technology, it is now possible to choose from just two cleaning programs: a fast pool floor only or a deep floor, wall and waterline cleaning. Pool owners can simply select the cleaning frequency that best matches their pool debris load, and AquaVac 500 gets to work, using powerful, dual scrubbing brushes that scrub and vacuum the entire pool. Discover why AquaVac 500 is the most efficient, self-sufficient cleaning solution on the market.

Low-profile cleaning.
High-profile results.

AquaVac® 500 features and benefits:

- Top-access debris container allows for rapid debris removal and easy cleanup.
- The program allows the cleaner to cover the entire pool faster by calculating the most efficient cleaning path.
- Features Dual-Mode technology with two cleaning programs: fast 90 minute pool floor only or deep 3-hour floor, walls and waterline cleaning.
- Integrated Recurring Timer allows choice of cleaning frequencies of every 24, 48 or 72 hours.
- Includes an instant Clean Now option that doesn't repeat.
- Dual powerful scrub brushes create a sparkling clean pool.
- Cord Swivel eliminates cord tangling.
- Out-of-Water Sensor prevents the cleaner from starting when out of the pool.
- Beach Entry Sensor detects when the cleaner is climbing out of the water, automatically reversing its direction.

Power Supply with Integrated Recurring Cleaning Timer and Dual-Mode Technology

Anti-Tangling Cord Swivel
