

# DRAIN COVER INSTALLATION INSTRUCTIONS

Applicable Models: 8-AV-XXXX / 8-PTD-XXXX / 10-AV-XXXX / 10-PTD-XXXX (XXXX Designates Color)

## Guidelines for use of the AV or PTD models:

- Multiple submerged suction outlets must be used per pump.
- Drain covers are not to be placed on seating areas or backrests.
- When two or more suction fittings are used on a common suction line, they must be separated by a minimum of 3 feet.
- In the event of one outlet being blocked, the remaining suction outlets need to be capable of meeting the necessary flow rate of the pump.
- Our product can be used on floor and wall. Replace all lids within 5 installed years.
- Please use appropriate tools for installation. (Phillips screwdriver)
- Please consult your standard head-loss curve to assist with installation. The head loss is dependent upon pipe length, pipe size, pump, distance from equipment, etc. that we cannot determine.
- Please do not exceed the approved flow rate stated on the product.
- Please use caution when increasing flow via increasing the pump size. Do not exceed local requirements and building codes.

## INSTALLATION INSTRUCTIONS :

1.) Attach riser ring to mud ring/sump using the two (2) #10 x 3/4" screws provided.

2.) Attach cover to the riser ring with the two (2) #10 x 3/4" screws provided.
