FEATURED

HYVE

The HYVE is a completely sealed fixture therefore making them ideal for installations on driveways, walkways, patios, decks, stairs and more. The HYVE produces either a WARM (3100k) or COOL (5800k) light that does not blind thanks to its honeycomb lens structure. It comes in two convenient sizes – 22mm (7/8”) or 60mm (2 3/8”) and has several accessories including trim rings and mounting plates available. Please visit our website for complete details.
