## Product

EnviroPad™

## Advantages

EnviroPad™ equipment pads are made from injection molded plastic. Their application is mainly as a base pad for ground supported equipment. Unlike other plastic pads, EnviroPad™ rugged design provides uniform and generous ribbing for optimum self-leveling ground support without inserts. The pads should be installed on roughly leveled soil or ground. EnviroPad™ equipment pads, due to their plastic composition, are not recommended for use in applications requiring pad contact with excessive heat or open flame. Enclosed is a table showing the allowable load estimates. Both 2" and 3" pads have the same weight capacity.

| Pad Size | Estimated Allowable Load |
|----------|--------------------------|
| EP2424-2 | 173                      |
| EP3030-2 | 270                      |
| EP3232-2 | 307                      |
| EP3244-2 | 422                      |
| EP3636-2 | 389                      |
| EP3842-2 | 479                      |
| EP1838-3 | 205                      |
| EP2424-3 | 173                      |
| EP3030-3 | 270                      |
| EP3232-3 | 307                      |
| EP3244-3 | 422                      |
| EP3636-3 | 389                      |
