LED Pool Light Fixtures

## LED Wet/Dry Fountain Luminaire - FX2 Series

**3** YR  
WARRANTY

Go Green  
Eco-Friendly

J&J Electronic's FX2 Cast Series - Wet/Dry Rated Fountain luminaires are designed and engineered to enhance your water feature appearance while saving energy and maintenance cost. The compact size and robust construction make it a perfect light for use in and around public and commercial water feature and fountain applications. The product is built to last, constructed in either solid cast bronze or solid cast 316 stainless steel. The IP68 rated fixtures are available in 120Vac or 12Vac input and come in both warm white or cool white LED configurations. The product options include flood and multiple narrow beam spreads. Fixtures come standard with an integrated lens guard and can be ordered with a mounting base for free standing applications or without the base for other installations. The FX2 Series product can be partially or fully submerged as well as used in damp or dry locations .

### Key Features:

- Integrated LED Technology
- IP68 Wet/Dry Rated
- Reduces Energy Usage
- Reduces Maintenance Cost
- No Relamping Required
- 50,000 hour LED Rating
- Heavy Duty Cast Construction
- 316 Stainless Steel or Bronze
- Warm White or Cool White LEDs
- 120V or 12V Input
- Multiple Beam Angles
- Dimmable (120V version only)

### Common Installations:

- Universities
- Country Clubs
- Resorts
- Hotels
- HOA's
- Retail Centers
- Business Complexes
- Municipalities

Cast Bronze  
With Base Option

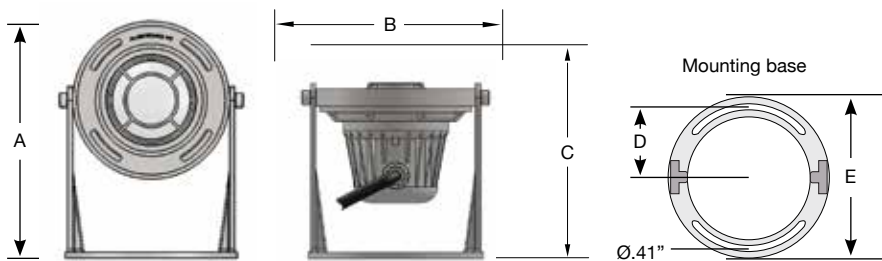

Cast Stainless Steel  
With Base Option
