

IntelliChlor®

Salt Chlorine Generator for Aboveground Pools

by Pentair Water Pool and Spa®

*The Easiest Way to Maintain
Safe, Sparkling Pool Water*

for Aboveground Pools

Introducing the Intelligent Alternative to Handling Chlorine

Sparkling Pool Water has Never Been This Easy

Electrolytic chlorine generation is the easiest, most effective and convenient way to keep pool water crystal clear and safe. The IntelliChlor® IC15 salt chlorine generator uses table salt to produce all the chlorine your aboveground pool needs.

- Same sanitization performance as manual chlorine addition without the drawbacks.
- No need to buy, transport and store expensive chlorine compounds.
- No more odor, stinging eyes, irritated skin and bleached-out swimsuits.
- Intelligent controls and easy-to-read displays tell you what to do and when to do it to maintain perfect pool water.

Taking Electrolytic Chlorine Generation to a Higher Level of Convenience

IntelliChlor IC15 is the new standard in chlorine generator technology, giving you the ultimate in convenience, reliability, and safety. To understand why the IntelliChlor IC15 is better, it helps to first understand how it works.

Table salt (sodium chloride) is added to the pool water...less than a teaspoon of salt per gallon of pool water is all that's required. As the dissolved salt flows through the generator cell, it is electrolytically converted to pure chlorine, which is then distributed throughout the pool, sanitizing the water, keeping it fresh, clear and safe.

Unlike conventional chlorine additives that must be constantly replenished, the salt is recycled continuously, day after day, to further reduce pool maintenance requirements. The generator even has an automatic reverse cycling feature that minimizes the need to clean the cell and prevents scale build-up for longer life.

Simple and Safe

Monitoring chlorine production is easy with the IntelliChlor IC15. It's the only one with all controls and displays built into the cell—and the only one providing so much helpful feedback to you. Just select from one of five sanitizing levels to easily manage chlorine addition.

- Easy-to-view displays enable fast checking of salt levels, cell cleanliness, sanitizer output and water flow.
- Adjustment is as easy as pressing two buttons.
- All performance data—production settings, hours of operation, chlorine output, cell cleaning cycles, salt readings and water temperature averages—are captured daily, making it easy to maintain perfect water.
- Exclusive cell use tracking feature communicates remaining hours of cell life in real-time.
- Integrated sensors in the generator cell ensure that water flow is adequate for safe chlorine generation; under low water temperature conditions, automatic shut-off feature protects the unit and prolongs cell life.
- IntelliChlor IC15 only operates when your pool pump is running, ensuring system efficiency and safety.

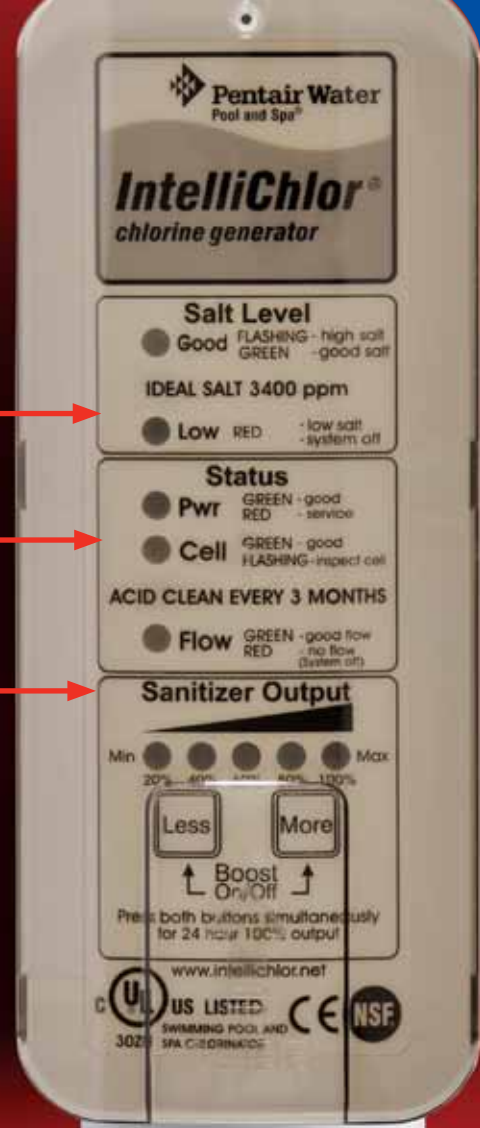

*Two LED Salt
Level Indicators*

*Two-color Status
Displays*

*Five Sanitizer
Output Levels with
Two-button Control*

Take the guesswork out of sanitization with **Easy-to-read** Displays and **User-friendly** Controls

Simple design is easy to install

*Install Horizontally or Vertically—
the 2" threaded couplings make
plumbing connections quick
and easy*

*Clear, sliding cover protects
settings and permits easy
system status viewing*

*The cell and control panel
are combined in one assembly,
so there's no need for a
separate control box*

*Sealed mini power
center mounts to
the wall at pump/
equipment pad
for easy AC wiring*

Reliability is Built In

The IntelliChlor IC15 salt chlorine generator is engineered to stand up to the toughest pool conditions and provide years of dependable performance.

- Titanium electrode cell blades are coated with Ruthenium oxide.
- Control electronics are isolated in the cell, away from high heat components, for longer cell life.
- Totally waterproofed electronics for maximum reliability.
- Rugged, dependable power supply/transformer is UL Listed and can be mounted vertically on the wall up to 15 feet away from the cell.
- Union inlet and outlet connections make cell replacement fast and easy.

Engineered for Safety

The IntelliChlor IC15 salt chlorine generator meets important standards for safety.

- The power supply cell and electronics meet the requirements of the UL 1081 Standard—the industry standard for pool salt chlorine generators.
- The power supply itself is UL Listed with flammability rating UL 94VO.

The Perfect Choice for Aboveground Pools of 15,000 Gallons or Less

- Produces up to .60 pounds of pure chlorine every 24 hours.
- Cell blades are capable of producing chlorine for at least 7,500 hours.
- Electronics run cool for long, reliable life.

Why the IntelliChlor® Salt Chlorine Generator is the “Greenest” Choice

An Eco Select™ Brand Product

The Eco Select™ brand identifies our “greenest” and most efficient equipment choices. Using only table salt, the IntelliChlor® IC15 salt chlorine generator creates pure chlorine in your pool and eliminates the need to buy, store and add harsh chlorine products manually. In effect, fewer resources are used in the production, packaging and transportation of these chemical compounds. That's why the IntelliChlor IC15 is an Eco Select choice.

As the global leader in pool and spa equipment manufacturing, we strive to provide greener choices to our customers. We hope you'll join us in embracing more eco-friendly poolscape by choosing Eco Select branded products for your swimming pool.

Production and transportation energy and waste are reduced

- Less chlorine needs to be produced at chemical processing plants for use in swimming pools and spas. This reduces emissions and energy use from production, packaging, and transportation.

Provides effective sanitization performance without the drawbacks of expensive chlorine compounds

- You no longer need to buy, transport, store or handle chlorine products. This reduces the chance of spills or accidental exposure and eliminates cost.
- IntelliChlor's constant chlorine production helps prevent the formation of chloramines that cause odors, irritated skin and stinging eyes.

Engineered to stand up to the toughest pool conditions and provide years of dependable service

- Control electronics are isolated in the cell for longer cell life.
- Waterproof electronics for maximum reliability.
