Choosing and Changing Colors (continued)

STEP 2

Figure 1

Figure 2

Figure 3

STEP 2:

1. Remove lamps to control/Rename lamps
2. This is the color chooser. Place your finger inside the circle area to choose a color. The small circle on the top left will show the color you have chosen.
3. Choose Red, Blue, Green, White, or full color fade.
 - Holding down on the full color fade icon will activate a screen to choose the fade speed*:
 - Fast1 : 2 seconds Slow1 : 15 seconds
 - Fast2 : 8 seconds Slow2 : 60 seconds
- * Times stated are not actual times, but approximate fade speeds
4. Adjusts the light output level from 5% - 100%.
5. Activates the timer settings of this lamp (see CREATING TIMERS section).
6. Click the (+) icon to save this scene.
 - Select a name for the new scene.
 - Click OK (see Figure 2).
 - Click CONFIRM to save this scene (see Figure 3).
 - The scene will now appear on the bottom section of the lamp control screen (see Figure 3).
 - Activate this scene by clicking on it.
 - Turns off the selected lamp.

MR16 RGB-W LED Lamp

Setting up Groups How to control more than 1 lamp at a time by group

STEP 1:

- Click the Light Bulbs Icon on the bottom of the main screen

STEP 2:

- Click the icon to create a new group (Note: The other icon will be used to delete groups later)

STEP 3:

- Enter the name of each group you want to create and hit CONFIRM.

STEP 4:

- Touch the (+) icon to add lamps to the new group
- Touch the (-) icon to remove lamps from the current group

STEP 5:

- Choose the group you want (long press on a group). You can then change the color and brightness of all lamps associated with that group.

(Note : You can also remove lamps from the group from this screen)
