

*The RL is specifically designed to gently illuminate small scale plant material, rocks and short garden walls. The halogen lamp model offers a high-efficiency white light, while the xenon lamp produces a mellow golden light that enriches earth tones.*

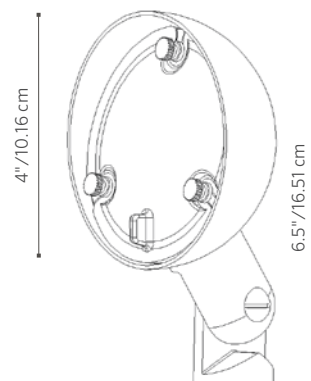

## RL: Up Light

### *Lighting Effects with the RL*

To wall wash with the RL, the fixtures should be installed 12-18" from the base of the wall, 6-8" on center, thereby creating an even illumination.

*Note: This fixture is designed for up lighting only.*
