

# OXEO VP

## Connected peristaltic ORP chemical feeder

### AUTOMATED CHEMICAL REGULATION

Oxeo VP measures the ORP and adds an oxidizer to the pool water if the ORP is below the defined limit value. Oxeo VP automatically adjusts the ORP of the water.

### CONNECTED AND INTUITIVE

Regulate your ORP from a simple, and easy to use application, setting alerts, schedule chemical dispensing, receive alerts directly to your phone, and let the Oxeo do the rest.

Compatible with Vigipool

### RELIABLE AND SIMPLE

The Oxeo VP is paired with a compact measuring probe to make ORP measurement more reliable and simplify the installation of your device.

### QUICK VISUALIZATION

The peristaltic dosing Oxeo VP is equipped with a color changing, LED light, which changes according to the water chemistry of your pool.

### EASY TO INSTALL

The Oxeo VP is the easiest ORP regulator system to install in the market. Plug the Oxeo VP into any protected 120 V outlet. From there, the flow rate sensor captures the filtration status and gives you a more reliable indication. For an even easier setup, you can add a measurement chamber (Zelia Pod), which houses all the accessories needed to treat your pool water in a single location. The Zelia Pod has slots for the flow switch, ORP probe, and injecting tube.

## COMPLETE AND INTUITIVE SETTINGS

The settings for ORP regulation can be done in mere minutes, thanks to a single button or the intuitive smartphone app, allowing for additional settings and functions.

AVAILABLE SETUP	APP.	DEVICE
Choice of setpoint value (500mv to 700mv)	✓	✓
Calibration of the 2-points sensor	✓	✓
Manual adjustment of the measurement	✓	✓
Overdose alert setup	✓	
Tank volume setup	✓	
Remote setup	✓	

## PEACE OF MIND WITH A QUICK GLANCE

The peristaltic dosing Oxexo VP is equipped with a color changing, LED light, which changes according to the water chemistry of your pool. This patented process provides you with the water chemistry feedback you need, from across your pool deck, and immediately tells you when your pool needs to be rebalanced.

SET-UP	COLORS
Sensor calibration	Green, Yellow, Red
DAILY CONTROL	COLORS
Measuring error	Purple
Maximum daily volume	Orange
ORP measurement	Green, Yellow, Red

## OXEXO VP IS SUPPLIED WITH:

To make your installation even easier, it's possible to add a Zelia Pod measurement chamber which requires just one hole, drilled in the piping.
