THE PAL FAMILY OF LED LIGHTING

PAL TREO

THE NIGHT NEVER LOOKED SO GOOD

LED THE PAL FAMILY OF UNDERWATER LED LIGHTING SYSTEMS

Lighting a swimming pool is as much an art as it is a science. At **Fiberstars** we've mastered the science with our **PAL** family of **LED** (Light Emitting Diode) underwater lighting systems. The **PAL TREO** and **PAL 2000** low voltage lights are designed to be energy efficient, with an incredibly long lamp life and only need a small unobtrusive wall fitting for installation. Because they require no grounding or bonding and can be placed in shallow or deep areas they provide the most flexibility when it comes to light placement. With a specially molded lens you will get outstanding light distribution, eliminating shadows common in traditional single lamped pools. All this flexibility allows your pool designer to place light fixtures where they are needed in order to illuminate features like steps, swim outs, grottos and sun shelves. That kind of flexibility and the fact that all **PAL** lights produce an amazing pallet of colors through its **RGB LED** technology, gives you the power to create art in your own backyard.

a. Beach entry or Step lighting with a PAL light; not possible with conventional lights.

a.

*Careful planning and light placement
can create a whole new dimension
about your pool...*

With a **100,000 hour LED** lamp life and using only 12 volts a **PAL** light will give you years of service with little or no maintenance. **b.** Beautiful colors wash in this elaborately featured pool and spa. **c.** The **PAL** light's small profile helps them blend in, so what you focus on is the reflected light in the pool, not an overwhelming bright light source common with more traditional pool lights. **d.** A fine example of the rich color pallet of **PAL RGB LED** technology **e.** A stunning vista complements the lighting on the pool, spa and waterfall. **f.** Another example of a balanced and evenly illuminated pool lighting design. Notice how the lights are properly placed facing away from the house to avoid direct view of the light sources. Strategic light placement will help achieve these goals...*the night never looked so good!* Ask your builder for lighting and control systems exclusively from **Fiberstars** so you can get the most enjoyment from your pool, day or night.

The **PAL TREO**
LED Underwater Light

Trim rings included with the PAL Treo Light come in four colors options; black, gray, beige and white, so you can match your light to the surface of your pool or spa.

Trim Rings

The PAL 2000
LED Underwater Light

The **PAL Treo** and **PAL 2000** will both color synchronize with the **Light Streams** series of water features. The **PAL 2000** is our most popular light for fiberglass pools. **g.** Both the **PAL Treo** and the **PAL 200** have six lock-able colors and two color change modes that will color synchronize with the Light Streams series of water features making it a great value in the growing family of 12VAC products by FiberStars.

... PAL lighting systems will add years of enjoyment with worry free service.

If you own an existing pool with fiber optic lighting, you may want to consider retrofitting with the **Pal** family of **LED** lights. Be it a pool renovation, retrofitting or new construction, **PAL** lighting systems will add years of enjoyment with worry free service.

With over 30 years in swimming pool lighting technology design and manufacturing, **Fiberstars** continues to lead the way and provide it's customers with quality products and service you'd expect from a respected industry leader.
