

FX | LUMINAIRE®
PD-20

COMMERCIAL QUALITY,
 RESIDENTIAL PRICE POINT

The patent pending PD is engineered to bring light to areas such as walkways, stairways and decks as well as to other foot traffic hazards that don't have an adjacent planter area for pathlighting or trees and trellis from which to downlight.

Incorporated into the design is the LevelX® feature. The LevelX® assures the lighting installer that the faceplates of these permanently mounted fixtures will remain perfectly level upon completion of the installation. Many step and wall lights on the market today are designed so that if the mounting box is installed out-of-level, the faceplate, once installed, will also be noticeably out-of-level.

Some of the features of the PD include: Sleeve is permanently mounted in concrete or wood wall combined with multiple threaded knockouts, easy-to-remove box for unforeseen future problems prevents having to chip away at the wall for repairs, and corrosion-free stainless steel inserts.

PANCIADUPPIO® | FX LUMINAIRE®

PERFECTION EVERY TIME
 The Patent Pending LevelX® system allows the composite sleeve to be up to 3/8" out of level, in either direction, while still allowing the faceplate to be laser level!

The secret: The trim attaches to the adjustable reflector assembly – not the composite sleeve or body. Heavy foam gasket keeps light spill to a minimum.
