

*MAINTAINING HEALTHY POOL WATER
HAS NEVER BEEN SO EASY!*

QUIK FRESH™

HEALTHY, FRESH WATER CIRCULATED THE EASY WAY!

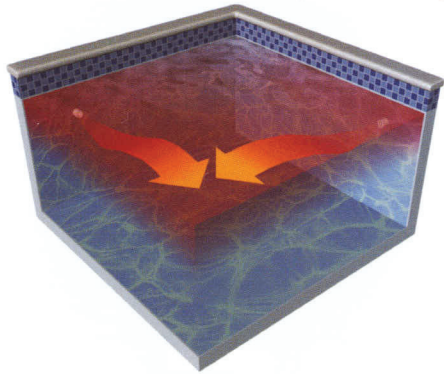

TRI-FLOW DESIGN

ADVANCED CIRCULATION

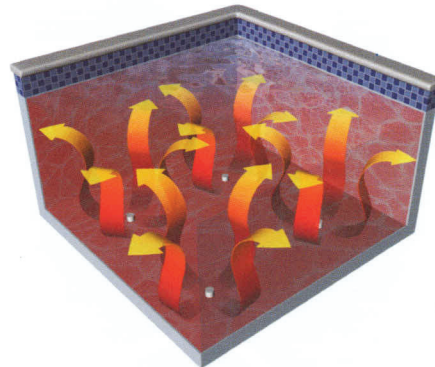

**A&A™
MANUFACTURING**

QUIKFRESH™

Conventional System

Only circulates heated and sanitized water at the surface.

QuikFresh Circulation*

Efficiently re-circulates heated and sanitized water evenly throughout the pool.

QUIKFRESH IS THE KEY TO SUPERIOR CIRCULATION

A healthy, fresh and safe swimming pool environment should always be a primary concern when considering a new pool for your family. Creating a continuously sanitized pool is the result of careful planning and proper water circulation. QuikFresh is designed to circulate sanitized water throughout your new swimming pool and/or spa. Patented, flush-mounted, circulation heads are strategically located in the bottom of your pool or spa. At timed, systematic intervals, these circulation heads will pop-up, and disperse streams of fresh, filtered and sanitized water throughout your pool. This fresh circulating water means a healthy pool environment. QuikFresh provides peace of mind every time you swim.

EFFICIENT HEATING

QuikFresh disperses heated water to the pool floor to effectively eliminate thermal layering while saving on precious energy dollars. Even if a heater is not used, QuikFresh can efficiently re-circulate the solar heated top water evenly throughout the pool to extend your swimming season and your swimming enjoyment! QuikFresh is also great in spas.

BENEFITS OF QUIKFRESH

- Healthy, safe pool water
- Efficient distribution of sanitized and heated water to reduce pool heating costs.
- Highly effective chemical distribution
- Works in concrete, vinyl and fiberglass pools
