

Scaletec Plus® do-it-yourself Synertec™ technology makes pool descaling easy, safe, and very affordable.

Scaletec Plus® Overview

Scaletec Plus™ utilizes technologically advanced materials successfully proven in the industrial water treating industry to create the strongest scale-stain-scum remover - ever! Scaletec Plus non-acidic and virtually phosphate-free (2.4%) components make it easy to remove buildup. Its unique Synertec™ formulation provides extraordinary surface protection in all types of swimming pools under the most demanding water conditions. Highly effective in both soft water (stain forming) and extremely hard water (scale forming) at hardness exceeding 1000 ppm. The powerful Synertec™ organo-phosphonates and polymers quickly dissolve and remove even the most difficult calcium scale deposits. This formulation is also highly chlorine stable resulting in long lasting protection. One 64 fl. oz. (1/2 gallon) bottle will descale most calcified pools in 2 to 4 weeks without acids or scrubbing. Once a pool is cleaned, only 1 fl. oz. of Scaletec Plus per 1,000 gallons is needed monthly to maintain total protection. The exceptional cost value of Scaletec Plus has finally made surface descaling affordable, safe and very easy to perform.

Scaletec™ Makes
Surface Protection
Maintenance-Friendly™

Synertec™ Formulation

Scaletec Plus offers superior surface protection due to its innovative Synertec™ formulation. This advanced synergy formula combines a new generation of organo-phosphonate inhibitors with stabilized copolymers that out-perform conventional sequestering agents (HEDP type in quart bottles) traditionally marketed in the swimming pool industry. The advanced Synertec™ formula is multi-functional by utilizing a complex mechanism of "threshold inhibitors," crystal modification and sequestration to accomplish aggressive cleaning action and prevention without harmful acids or mechanical cleaning processes. Scaletec Plus's exceptional performance is due, in part, to its high chlorine stability not found in HEDP based products. With Synertec™ technology, pool surface and tile descaling can be easily accomplished at any time.

Scaletec® Advantages

The Easiest Way To Keep Surfaces Clean

- ★ Descals most calcified pools with one 64 fl. oz. bottle. Simply add product, raise water level and wait 2-4 weeks.
- ★ Quickly removes white calcium scale, mineral deposits, stains, and scum from all pool surfaces and tile.
- ★ Works continuously to prevent all new deposits, stains, and scum buildup . . . with a small monthly dosage.
- ★ Also protects pool filter, heater and solar unit.
- ★ Excellent descaler during the non-swimming season
- ★ Eliminates laborious scrubbing, acid washes and expensive mechanical cleaning processes
- ★ *The Easiest Way To Keep Surfaces Clean*
No wait! Swim immediately after treatment
- ★ Unlike most quart size products, this powerful Scaletec Plus bottle lasts months - not weeks.
