

Instructions

Directions for use:

1. Shake well
2. With circulation pump running, slowly pour **Instant Pool Water Conditioner** into pool skimmer or pour directly into pool water, while walking around the edge of pool. Brush to speed dispersal of the product.
3. Rinse container with pool water and shake to ensure all product is removed from the bottom of the bottle.
4. Pour remaining rinse solution into skimmer or pool.

Dosage Tips:

1 gallon of **Instant Pool Water Conditioner** raises CYA levels by 32ppm per 10,000 gallons.

Note: If CYA level is less than 30ppm, calculate the gallons of **Instant Pool Water Conditioner** needed using the following formula: 4oz added to 10,000 gallons = 1ppm increase of conditioner stabilizer level.
