

## Instructions

Note: Anionic polymers used in many metal and scale control products should not be dosed to swimming pool water at the same time as water clarifiers. Cloudy water, precipitation and reduced product effectiveness may result. Wait 24 hours between additions.

### Directions for use:

This product is designed for use in properly balanced pool water. **Do not overdose.**

**Standard Dosage:** 1oz per 6,000 gallons weekly

**Cloudy Water Dosage:** 1oz per 4,000 gallons (repeat as needed every 48 hours after cleaning the filter).

1. Using flip squirt cap, apply **Clear and Perfect** at recommended dosage rate to the pool water evenly across the pool surface (see side of bottle for measurement marks).
2. Concentrate on deep water areas.
3. Run filter system continuously for at least 6 hours after application.

**Weekly Maintenance:** To keep pool water clear and clean, treat with **Clear and Perfect** once a week at the **Standard Dosage**. For pools with heavy usage, treat twice a week with the recommended **Cloudy Water Dosage**.
