

WallSpring® Decorative Accents Installation Instructions

Installation Guidelines

WallSpring® Decorative Accents should be installed on the vertical surface using a flexible material like marine grade silicone.

Plumbing should be installed through the wall of the pool or fountain in the exact location for the installation of the Accent. A valve should be installed on each plumbing line to the Accents. If multiple Accents are installed, separate valves need to be installed in positions that allow individual adjustment.

Installation of all Accents except the Sconces

Place Accent on the wall over the pipe. Measure and align the Accent and mark the exact location. Measure the pipe length from the wall to the socket and make the appropriate cut. Guidelines for each of the units is shown on the reverse along with dimensions and weights. Apply the silicone in a continuous bead around the back of the Accent. Apply silicone to the pipe and in the hole of the Accent. Make sure to use a smooth tool to remove the excess in and around the water exit hole to assure proper water flow through the mouth. The adhesive should hold the Accent in place. In the event the unit does not stay secure, apply tape or similar means to the unit. Once the adhesive is dry, the Accent will be secure.

Sconce Installation

Installing a Sconce requires a slightly different installation technique. First, align the Sconce and mark where the pipe needs to penetrate the back. Next, drill a pipe installation hole using the 1" drill bit. (NOTE: It is preferred that the hole is as low on the back as possible to help level the water flow. In the event this is not possible, allow enough room in the unit and cut the pipe to allow for a ¾" 90 degree elbow to be installed. Apply the silicone in a continuous bead around the back of the Sconce and around the pipe hole. Install the Sconce, align and then install additional adhesive around the pipe hole. Make sure to wipe off all excess adhesive. Allow the adhesive to dry and the unit is ready to be started.
