

Poolmaster 36631 Spray Kit for Pool Slide

Assembly Instructions

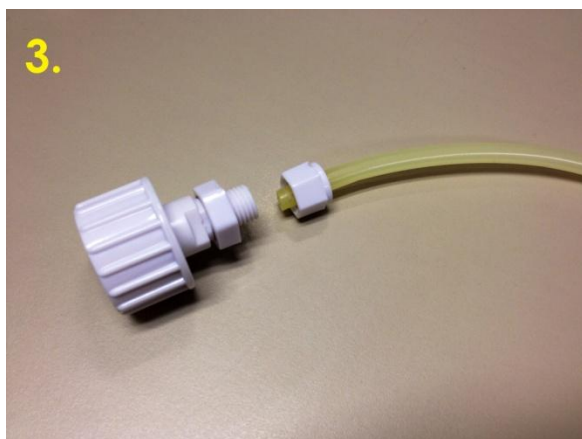

Package Contents:

Diagram	DESCRIPTION	QTY
A	Flexible tube	1
B	Hose connector	1
C	Gasket seal	1
D	Center connector/manifold	1
E	Union bolt	1
F	Wide spray nozzle	1
G	Narrow spray nozzle	1
H	Plastic nuts	4

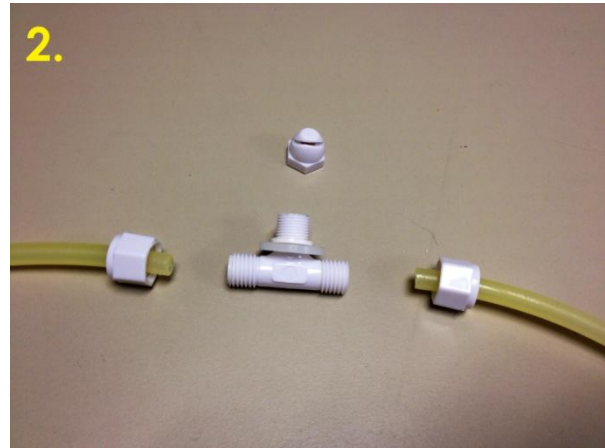

The Hose Connector

1. Hose connector, gasket seal, and a plastic nut.
2. Insert the gasket seal into the hose connector.
3. Take one end of the tubing and insert into a plastic nut so the threading faces away from the tube.
4. Screw the nut with tube attached to the hose connector.

* The hose connector will screw onto a standard garden hose.

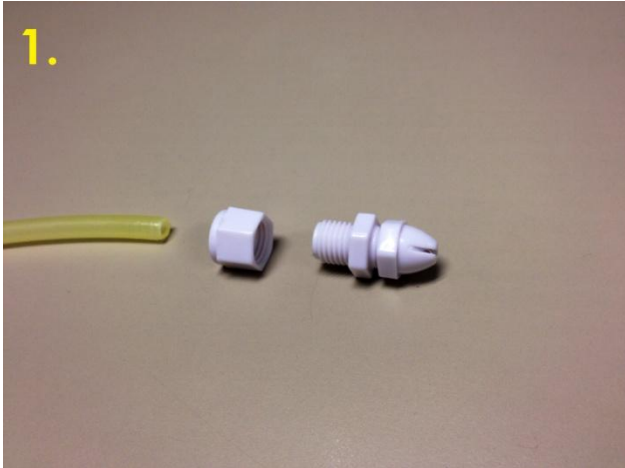

Center Connection and Nozzle

1. Fully assembled center piece.
2. Carefully cut the tubing at a length that will correspond to your slide's lower water spout. Insert tubing into plastic nuts.
3. Screw plastic nuts and wide spray nozzle onto center connector.

* See page 6 for instructions to differentiate wide and narrow spray nozzles.

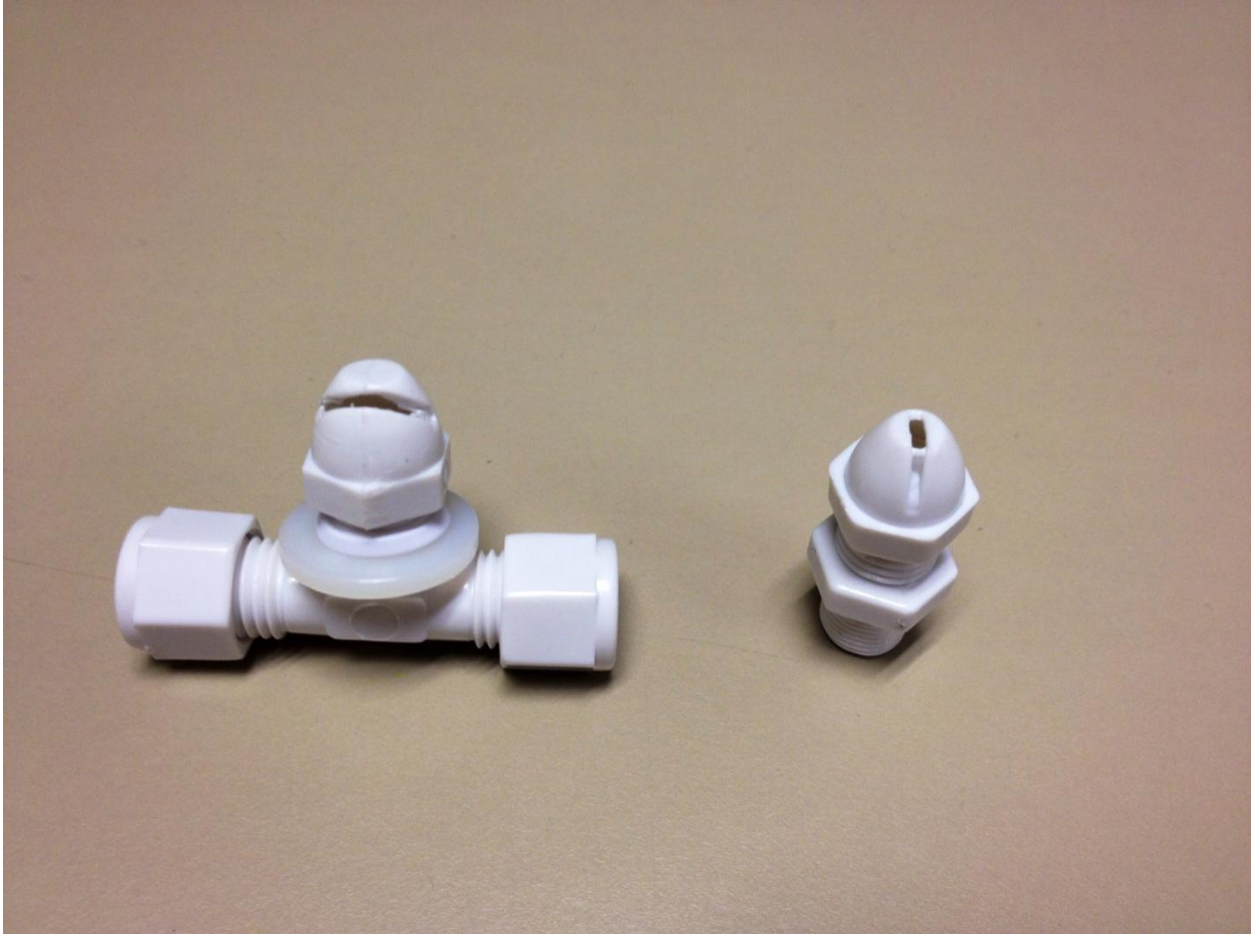

Main Nozzle

1. Insert tube into plastic nut. Screw narrow water nozzle onto union bolt.
2. Fully assembled main nozzle.

* See page 6 for instructions to differentiate wide and narrow spray nozzles.

Differentiating Wide and Narrow Spray Nozzles

Left: Wide spray nozzle. Notice the horizontal slit.

Right: Narrow spray nozzle. Notice the vertical slit.
