## POWERFUL SUCTION. FAST CLEANING. INTELLIGENT.

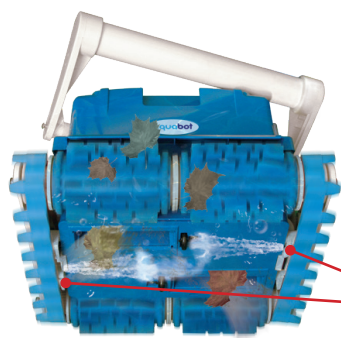

The Aquabot Turbo T4-RC Plus is designed to clean residential In-Ground Pools of all sizes and surfaces. The Aquabot Turbo T4-RC Plus provides intelligent cleaning for your in-ground pool by spending most of its time on the bottom where the majority of the dirt can be found. It cleans the pool floor, walls and waterline.

This cleaner is equipped with NeverStuck™ Rollers to help overcome main drains and other obstacles, as well as G-Tooth™ tracks to protect your cleaner from excessive rubbing against your pool sides. This cleaner uses Dual Drive Motor Turn Technology to maneuver around the pool.

Additionally, it is equipped with a 4-Way Wireless Remote Control for spot cleaning tough to reach areas of the pool.

### KEY FEATURES

- Dual Drive Motors
- Extra Long 75' Cable with Swivel
- Patented Power Washing Jets
- 2 Cleaning Cycles
  1. Pool Floor, Wall and Waterline
  2. Floor Only
- Wireless Remote Control
- Programmable for External Timer\*
- Free Caddy Included!

Power washing jets deep clean dirt that other cleaners leave behind.
