

The Prozone® Twister™

Advanced Oxidation Air Purification System

enjoy the best
outdoor air
imaginable ... indoors!

The Twister™ is more than an air purifier. This unique and powerful device destroys biological & chemical pollutants in the air and eliminates their associated odors — with no harmful by-products. The Twister is the only air purification device for individual use to harness the force-multiplying power of advanced oxidation. With its patented arsenal of nature's secret weapons — advanced oxidation, pure O₃ ozone, and germicidal ultraviolet light, it simply cannot be compared to other products that just attract and hold pollutants and pathogens.

Great for Home, Car, Office and More

- A single unit can treat a 3,000 sq. ft. home or office — place it in front of the air return to help clean up the ductwork.
- The Twister is great in commercial settings where odor control & sanitary conditions are a particular concern, like health clubs, spa enclosures, locker rooms, pool rooms, veterinary clinics, and medical and dental offices.
- Hotels and car rental agencies use it to convert smoking rooms or cars to non-smoking units.

Versatile and Customizable

Three operating modes and a precision-engineered timer allow full customization.

- **Ultraviolet Sterilization** This light-duty mode is always on and provides general cleaning of the air.
- **Timed Ozone and Advanced Oxidation** The timer is set for ozone generation at planned intervals, such as when residents, clients or employees are present.
- **Continuous Ozone** Used for heavy-duty jobs, like eliminating strong odors, when occupants are not present for extended periods.

Specifications and Features

- Easy to use: two switches, mechanical timer
- No installation: simply position unit in appropriate location and plug into an electrical outlet
- Ozone purity: 100%, no nitrogen byproducts
- Arc tube life 20,000 hours
- 2 fans, one each for air intake and outflow
- Air flow rate 20 CFM
- Washable polymer filter on intake vent
- Electrical: 110/120 VAC
- Compact: 14"W x 4"D x 13½"H
- Lightweight & portable: 6 lbs, rugged HDPE plastic
- Quiet, low cost operation (< 100 watts)
- Virtually no maintenance, no plates to clean
- One year manufacturer's defect warranty
- EPA EST. No. 73054-AL-001
