WATER SYSTEM				<i>For copper tube heat exchangers see listing on pages 16-17. It is recommended to use cupronickel heat exchangers for swimming pool applications.</i>			
<i>Code Compliant ASME Tube Assemblies</i>				10534301	Baffle, HX Front/Rear (indoor)	both .. 500	4.22
<i>Built in accordance with the requirements of the ASME Boiler and Pressure Vessel Code. Individually serialized with H-4 data reports on file as required by section HG-520.2 and HG-531</i>				10534302	Baffle, HX Front/Rear (indoor)	both .. 600	4.22
Cupronickel tubes with glass-lined headers , ideal for corrosive or softwater applications (under 7.5 grains hardness) or when hard water pumping creates higher tube velocities. Suitable for use with swimming pool heaters.				10534303	Baffle, HX Front/Rear (indoor)	both .. 715	4.22

Code Compliant ASME Tube Assemblies							
<i>Built in accordance w/ the requirements of the ASME Boiler and Pressure Vessel Code. Individually serialized w/ H-4 data reports on file as required by section HG-520.2 and HG-531.</i>							
Copper tubes and glass-lined headers, ideal for hydronic or other closed loop, low oxygen content systems. Performs well w/ normal water (7.5 to 17 grains hardness) in volume water applications.
