

NEXA[®]
PURE

So Much More than just a chlorine generator

Nexa Pure provides soft, clean water with gentle chemistry levels that help keep your eyes clear and your skin velvety soft while protecting blonde and dyed hair. Our system uses mineral salts to produce a pure form of "free chlorine" and shocks chloramines out of the water, which sanitizes the water and eliminates the negative side effects associated with traditional chlorine pools.

AMERICAN SPS^{LLC}

NEXA[®]

PURE

Aesthetic Design

Intuitive Controls

Salinity read-out

Adjustable
turbo/boost duration

Safely operates at
1,500-8,000 ppm salt

Accepts 110v - 240v and
adjusts internal voltage
automatically

Higher daily chlorine production
Horizontal or vertical installation
Cell-cable quick disconnects

40,000 Gal. and 18,000 Gal. Models

Earth-Friendly & Safer

Nexa Pure greatly reduces the pollution and health risks associated with the production and transportation of concentrated chlorine. Nexa Pure uses only natural minerals to produce a pure “free” form of chlorine in small amounts that are immediately infused into the water for sanitization. After sanitizing the water, this free chlorine reverts to a salt mineral state (a continuous cycle). Thus, the pool’s environmental footprint is greatly reduced by eliminating the ongoing carbon emissions from chlorine production facilities and chlorine transport vehicles. Nexa Pure also protects the environment and human welfare by eliminating chlorine spills and the risk of mixing incompatible chemicals at the pool site.
