diving boards & stands

DIVING BOARDS 101

Diving boards and stands when combined create unique performance characteristics. The most common performance characteristic is "Flex" which correlates to the flexing action that takes place between the board and stand. Board and stand combinations generally fall into three "Flex" performance categories:

JUMP BOARDS—a flexible board on a base that utilizes a spring mechanism

DIVING BOARDS—a flexible board on a rigid base

DIVING PLATFORMS—a rigid board on a rigid base

The diving board and stand selector chart below provides a quick visual reference guide to compatible boards and stands and their corresponding performance category.

SALT POOL FRIENDLY

We know pool builders and consumers alike enjoy the benefits of salt chlorinator systems—that's why we've designed a line of products that perform well in salt pool environments. Our Salt Pool Approved icon is your visual assurance that the most durable and salt friendly materials have been used in manufacturing.
