	Product Connected to RS 485 line	Description of Function	First Year Released	First Firmware Support
44 Pin PCB	All Button Control Panel	Original AquaLink RS Control Panel.	1996	Revision C
	Dual Spa Side Switch Board	Allows 2 Spa Side Switches to operate. Can control 8 functions	1996	Revision C
	TeleLink	Remote control from telephone	1996	Revision C
	Auxiliary Power Center	Control of auxiliary equipment for any system above a AqL RS 8 or 2/6	1997	Revision E
	SpaLink RS	8 button wired spa side control with temp control and readout	1997	Revision G
	LX Heater	Gas fired pool and spa heater with digital thermostat control (GUI)	1998	Revision H
	Serial Adapter	Allows connection to a home management system.	1998	Revision HH
	OneTouch Control Panel	Small control panel with macro buttons	2000	Revision I
	OneTouch Wireless	Wireless operation of the AqL RS (2.4 GHz)	2001	Revision I
52 Pin PCB	AquaPure	Chlorine generator (salt chlorinator)	2003	Revision K
	AquaLink PC Interface Docking Station	Allow programs, labels, temp settings etc. to be down loaded then up loaded from a PC.	2004	Revision L
	AquaPalm Wireless Remote	Hand held water resistant remote which can be connected to a OneTouch or All Button Control.	2006	Revision M
CPU PCB	LXi Heater	LXi Heater becomes a "smart" heater.	2007	Revision N
	AE Heat Pump	AE Heat Pump becomes a "smart" heat pump.	2007	Revision N
	Variable Speed Pumps and Jandy LED Lights	Can connect to Pentair VS or VF and Jandy ePump	2008	Revision O.2
	ChemLink	Control of WaterMatic C1900, DuoClear, LM3 & AutoClear Plus	2009	Revision P
	Touch	Feature of Rev P, except will communicate with Touch Control.	2010	Revision Q
	iAquaLink	Allows control from the Web (iAquaLink) Adds control of Smart JVA and Cover Pools Interface. New features of Serial Adapter	2012	Revision R
